[1.4] Campus Setting

	
Songkhla Rajabhat University (Songkhla, TH)	
	
Songkhla Rajabhat University , Satun Campus(Satun, TH)	
Figure 1.4.1: Satellite imagery and territorial boundary layout of the campus sites, showcasing the integration of green spaces and surrounding regional ecosystems.	
	
Figure 1.4.2: English-translated screenshot of the official provincial information webpage for Songkhla Province. The highlighted sections officially verify the total land area (7,393km²) regional demographics, and density. (data: 2026, May)	

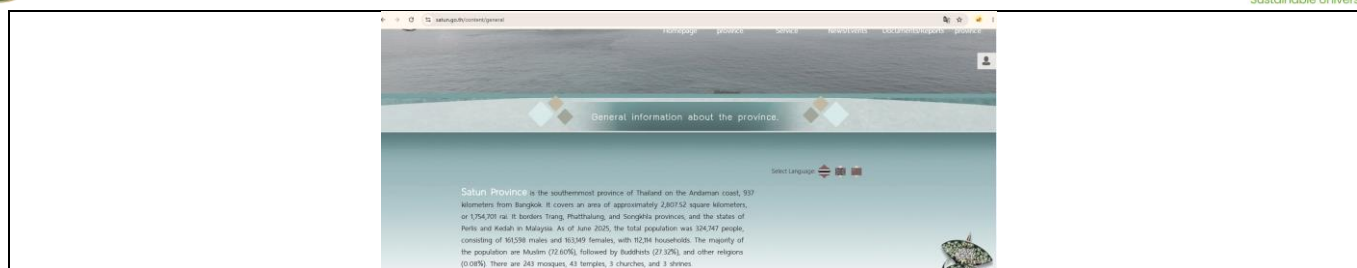

Figure 1.4.3: English-translated screenshot of the official Satun Province website. The data confirms the total geographic area (2,807 km²) and population statistics of the province, validating the rural and ecological setting of the Satun Campus in La-ngu District. (data: 2026, May)

Description:

Songkhla Rajabhat University (SKRU) operates two campus sites located in the southern part of Thailand. For the UI GreenMetric evaluation, the university's overall setting is classified as "**City**," reflecting the environment of its primary administrative and academic hub.

1. The Main Campus (Songkhla):

Situated in Mueang Songkhla District, Songkhla Province. It is located in a coastal area characterized by a mix of rich cultural heritage, urban dynamism, and natural landscapes, close to the Songkhla Lake and Khao Rup Chang hills. Songkhla Province covers a total area of approximately 7,393 km² with a total population of around 1.43 million, resulting in a population density of about 193 inhabitants per km². The main campus successfully balances urban accessibility with open green spaces, focusing on urban sustainability and climate resilience.

2. The Satun Campus:

Located in a more rural and ecologically diverse area in La-ngu District, Satun Province, which is known for its high forest cover, pristine coastal environments, and its status as part of the Satun UNESCO Global Geopark. Satun Province has a total area of approximately 2,807 km² and a total population of around 325,000, presenting a lower population density of about 116 inhabitants per km². This campus heavily integrates local environmental conservation and sustainable agricultural technology into its infrastructure.
