Country : Thailand
Web Address : www.skru.ac.th

[5] Transportation (TR)

[5.15] Number of initiatives to decrease private vehicles on campus. (TR.7)

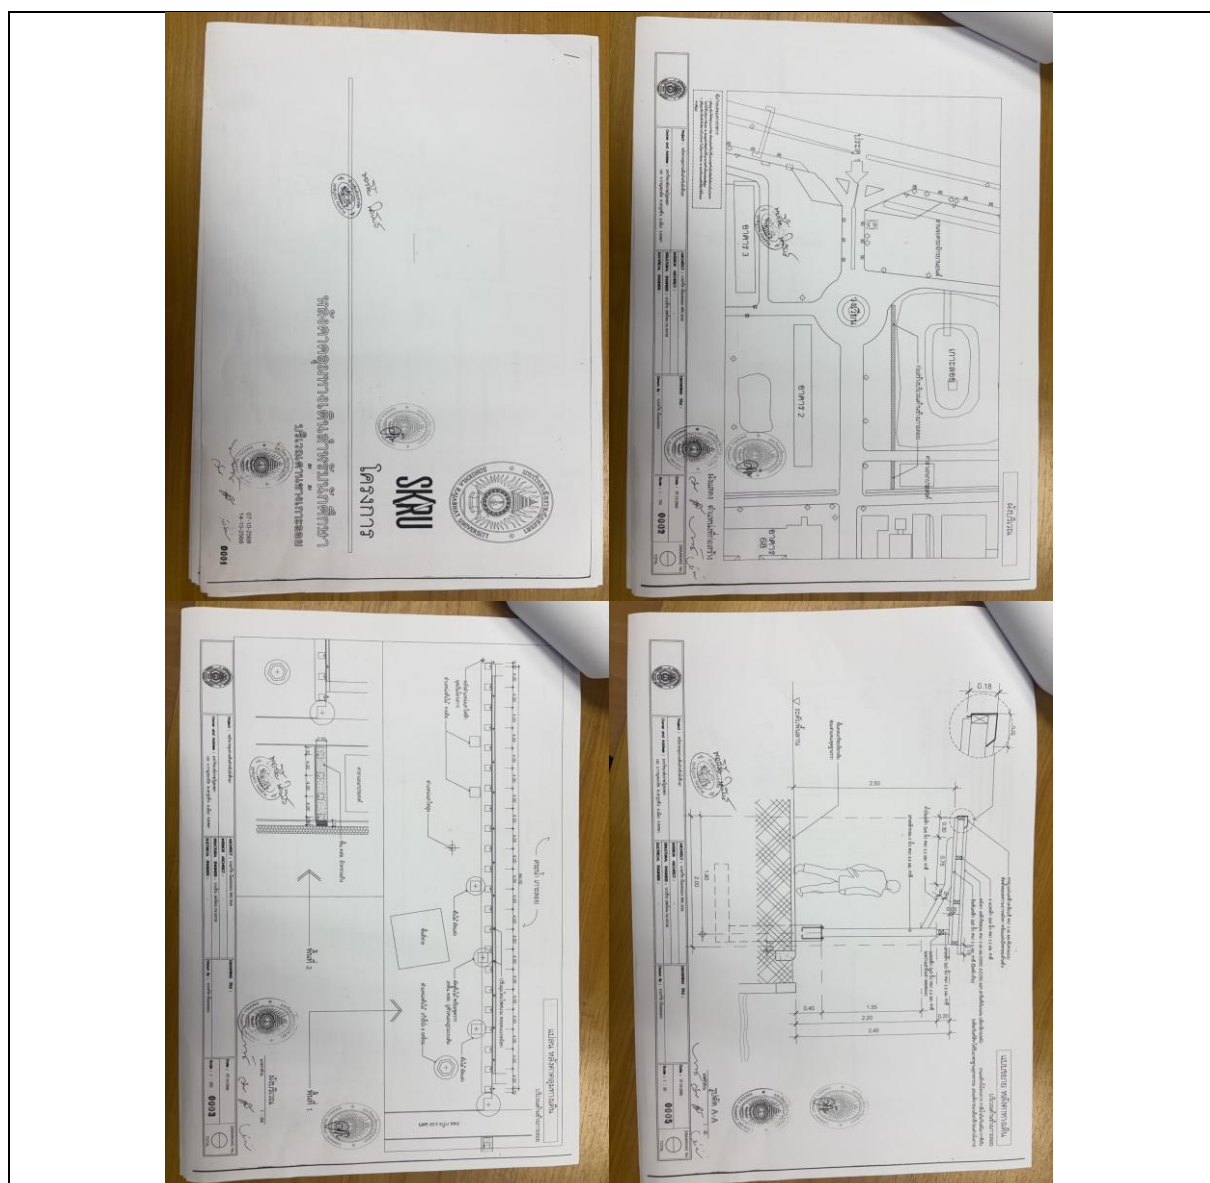

Figure: The university is currently constructing a 198-meter covered walkway and plans to add another 300 meters in the following year. These initiatives support walking, reduce short-distance private vehicle use, and promote sustainable campus transportation.

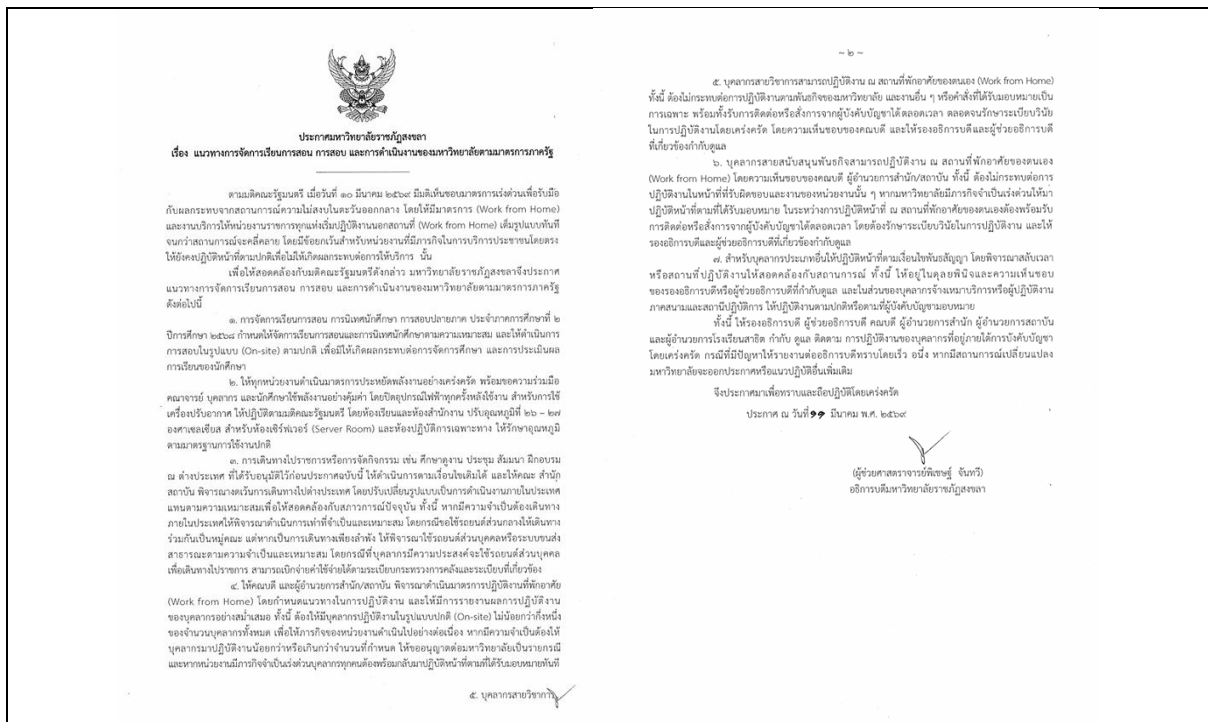

Figure: Songkhla Rajabhat University implements a Work from Home initiative during semester breaks to reduce the number of staff commuting to campus. This initiative allows personnel to work remotely from home while maintaining university operations through online communication and digital work systems. By reducing daily travel to campus, the Work from Home program helps decrease private vehicle use, save energy, reduce fuel consumption, lower carbon emissions.

Figure: Songkhla Rajabhat University has implemented a policy to restrict motorcycle access to the inner campus and require students to park their motorcycles in designated parking areas. This initiative helps reduce motorcycle movement within the campus, decrease traffic congestion, improve pedestrian safety, and encourage students to use walking routes and Electric Shuttle services for internal mobility. The policy supports the university's efforts to reduce private vehicle use and promote sustainable transportation.

Figure: Songkhla Rajabhat University has organized a campaign to encourage students to park motorcycles only in designated parking areas at Gate 1 and Gate 3. This initiative helps reduce motorcycle movement inside the campus, improve traffic order, decrease congestion, and enhance pedestrian safety. The campaign also promotes the use of walking routes and Electric Shuttle services for internal campus travel, supporting the university's efforts to reduce private vehicle.

Description:

Songkhla Rajabhat University has implemented four key initiatives to decrease private vehicle use on campus and promote sustainable transportation.

First, the university is currently constructing a 198-meter covered walkway and has planned to add another 300 meters in the following year. This initiative supports walking, improves pedestrian safety, and reduces the use of private vehicles for short-distance travel within the campus.

Second, the university implements a Work from Home initiative during semester breaks to reduce the number of staff commuting to campus. This initiative helps reduce daily travel, save energy, decrease fuel consumption, and lower carbon emissions.

Third, Songkhla Rajabhat University has implemented a policy restricting motorcycle access to the inner campus. Students are required to park their motorcycles in designated parking areas and use walking routes or Electric Shuttle services for internal mobility.

Fourth, the university has organized a campaign encouraging students to park motorcycles only in designated parking areas at Gate 1 and Gate 3. This campaign helps reduce motorcycle movement inside the campus, improve traffic order, decrease congestion, and enhance pedestrian safety.

Overall, these initiatives demonstrate the university's commitment to reducing private vehicle dependency, improving campus safety, lowering carbon emissions, and promoting sustainable transportation under the UI GreenMetric Transportation category.
