[5] Transportation (TR)

[5.3] Number of motorcycles entering the university daily (TR.1)

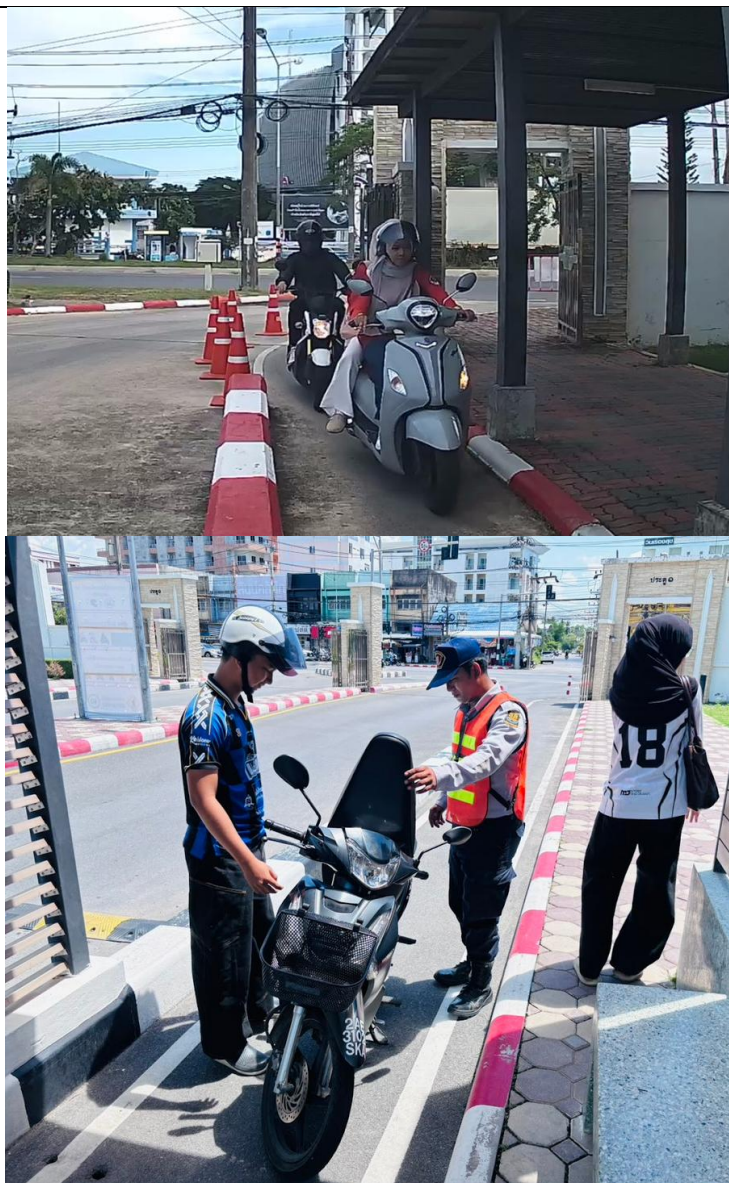

Figure: Dedicated motorcycle lane for entering the designated parking area, with security staff inspecting access at the university entrance to support traffic control and campus safety.

Figure: Designated motorcycle parking areas for students near the university entrance, supporting the policy to limit motorcycle access inside the campus and providing connectivity with Electric Shuttle services.

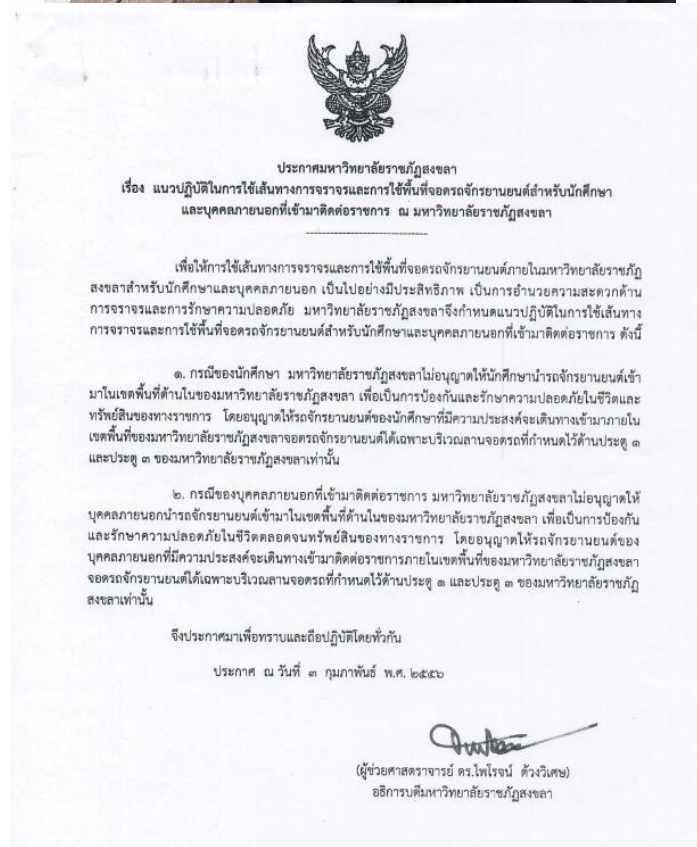

Figure: Motorcycle entry and exit policy signage and official university announcement regulating motorcycle access, parking areas, and traffic control measures for students, staff, and visitors.

No.	Combustion-engine motorcycles	Total Number
1	Combustion-engine motorcycles	
	- Student	300
	- Staff	89
	Total	389

Description:

The daily number of combustion-engine motorcycles associated with Songkhla Rajabhat University was recorded and classified by user group. The total number of motorcycles was 389, consisting of 300 student motorcycles and 89 staff motorcycles.

To reduce motorcycle traffic and combustion-engine vehicle movement inside the campus, Songkhla Rajabhat University has implemented a policy restricting students from bringing motorcycles into the inner campus area. Student motorcycles are required to be parked at two designated motorcycle parking areas provided by the university. These parking areas have a combined capacity of 2,043 motorcycles and are located near the university entrance and exit gates.

To support convenient and low-carbon mobility within the campus, Electric Shuttle services are provided to transport students from the designated parking areas to different locations inside the university. This measure helps reduce motorcycle movement within the inner campus, decrease traffic congestion, improve pedestrian safety, and support the university's sustainable transportation policy under the UI GreenMetric Transportation category.
