### Description:

Above is a list of the study program that have had changes approved through Curriculum Refresh programme which aims to embed sustainability into all course and module content offered by the University.

Songkhla Rajabhat University (SKRU) is strongly committed to integrating sustainability into its core educational mission. We have identified a total of 46 study programs across 7 faculties and 1 college that are directly related to sustainability.

The programs listed above have undergone a rigorous review process through our Curriculum Refresh programme. This initiative aims to systematically embed sustainability principles—covering environmental, economic, and social dimensions—into all course and module content offered by the University.

By integrating these concepts, we ensure that our graduates are equipped with the knowledge and competencies necessary to contribute to the Sustainable Development Goals (SDGs). The integration focuses on several key areas, including:

- Environmental Sustainability: Cultivated through science, agricultural technology, and industrial technology programs, focusing on resource management, eco-friendly production, and waste reduction.
- Economic and Social Sustainability: Embedded within management, humanities, social sciences, and fine arts programs, emphasizing community empowerment, local entrepreneurship, and the preservation of local wisdom.
- Educational Sustainability: Delivered through our Faculty of Education, ensuring that future educators are prepared to teach and promote sustainable practices in their professional careers.
